

Data Center Services

BEAR Data utilizes an enterprise-wide approach to help you manage your mission critical datacenter environments. Our services encompass the entire lifecycle, from assessment, strategy and design, to implementation and operational services. We have the expertise, proven methodologies and tools to help you manage your data center investments, improve operations and performance, and deliver business results.

Our Datacenter Services include:

- Data Center Feasibility Analysis
- Data Center Availability & Risk Assessment
- Data Center Power & Cooling Systems Analysis
- Data Center Technology Master Format Planning
- Project Cost Budgeting
- Project Management

Today's datacenter facilities are so much more than just walls, electric power and light, plumbing and HVAC. Today's datacenter incorporates all of these things and much, much more. From redundant power supplies, 24x7 backup facilities, and multiple environment control systems; to complete building control and automation systems, and miles of communications cabling. Today's datacenters are very complex environments and BEAR Data is there to help.

Data Center Engineering Services

BEAR Data employs an engineering team of experts that can assist with:

- IT Architectural Design
- Security Systems Design
- Cabling Systems Design
- Power Systems Design
- Cooling Systems Design
- Footprint/Space Management

BEAR Data Datacenter Solutions & Services

If you would like to schedule a meeting or a con-call to learn more about BEAR Data Datacenter Solutions & Services please contact us today.

Data Center Solutions

BEAR Data's datacenter engineering team can assist with the following solutions:

- Integrated Infrastructure Systems
- Cisco WAAS & Application Optimization
- UPS & Power Distribution
- Raised Flooring
- Fire Detection Systems
- Access Control Systems
- Racks, Cabinets & Accessories
- Structured Cabling
- Cable Management & Pathways
- Network & Security Infrastructure
- Server & Storage Systems
- Remote Access Systems

BEAR Data strives to ensure every datacenter solution meets the following criteria:

- Modular
- Easily maintainable
- Scalable
- Redundant
- Hot-swappable
- Manageable

Additionally, we offer the following advantages:

- On-site pre and post-sales support, including start-up and preventative maintenance services
- IT technology guidance to ensure the most appropriate product(s) are selected
- Engineering consulting to ensure your equipment is supported by the datacenter facility and will optimally integrate and coexist with the current infrastructure
- On-site project management to ensure equipment is received on schedule, installed properly and all documentation is completed accurately

If you would like to schedule a meeting or a con-call to learn more about BEAR Data Data Center Solutions & Services please contact us today.
