

## Storage & Data Management

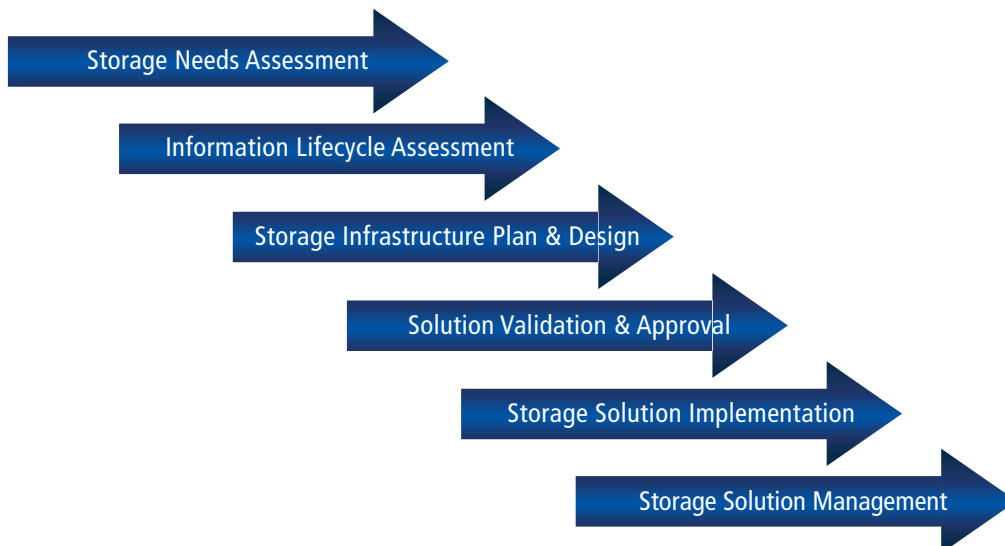

### Manage Information more Efficiently and Cost Effectively

Managing rapidly growing storage environments is an increasingly complex challenge for most businesses. Today's IT teams are being asked to deliver the right information, to the right place, at the right time, while also:

- Minimizing downtime and lost data risks in rapidly evolving IT infrastructures
- Utilizing networked storage technologies to keep pace with increasing storage demand
- Maintaining and adapting archive solutions with disaster recovery scenarios
- Ensuring data is kept safe and secure at all times
- Lowering total storage costs and delivering ROI

BEAR Data understands that storage decision makers now require repeatable and reliable storage solutions that fulfill a multitude of evolving and changing business demands. We also recognize that designing, implementing and managing an adaptive storage environment in a cost-effective manner has become increasingly difficult.

BEAR Data follows a phased methodology for storage solutions to ensure the client's specific needs are met and in most cases exceed.

### Simplify and Streamline Data Management

BEAR Data can help you improve, simplify and streamline data management, create superior disaster recovery plans and lower storage-related costs when deploying a SAN, NAS, DAS or IP storage networking solution.

## Simplify and Streamline Data Management

BEAR Data storage & data management solutions enable you to proactively simplify, securely manage and protect information while optimally aligning with your business objectives. We offer a broad portfolio of solutions, services and technologies to meet the specific needs of your particular business.

### Data Protection

- Backup & Recovery
- Disaster Recovery

### Storage Consolidation

- Windows File Servers
- Unix File Servers
- Linux File Servers

### Archive & Compliance

- E-Mail Management
- Enterprise Content Management
- File Management
- Regulatory Data
- Classification & Migration

### Application Optimization & Management

- Application Performance & Acceleration
- ERP & CRM Optimization
- Middleware Tools

### Database Optimization & Management

- Oracle, SQL & DB2
- Microsoft Exchange & SAP

### Storage Security

- Secure Consolidation
- Backup Security
- Application Security
- Client Management
- Content Filtering
- Virus Protection
- Endpoint Security

### Business Continuity

- High Availability
- Intrusion Protection
- Storage/Server Management
- Cluster Solutions
- Grid Solutions
